## HLM UK Equity Fund - Class 1

Fund No 17

HLM Fund Info Sheet As At: 29 March 2024

### Investment Objectives

The Fund seeks to achieve long-term capital growth expressed in euro by primarily investing in equities of companies domiciled in, or exercising the predominant part of their economic activities in the UK through investment in an underlying fund or funds which may be denominated in other currencies than the euro. Currency risk arises from fluctuations in the value of the euro against the base currency of the underlying fund. The underlying fund may invest in financial derivatives, other financial instruments and engage in leverage which may result in the overall risk exposure of the underlying fund to exceed their total net assets. For the full investment objectives, investment policy and risk factors of the underlying fund please consult the current prospectus. For operational purposes the HLM Fund may hold a proportionately small amount of its holdings in cash. When replacing an underlying fund the HLM Fund may also retain all its holdings in cash for the short period required between receipt of settlement price and execution of the buy order.
