

(18) HLM Global Equity Fund – Class 1

Fund Info Sheet as at 14 September 2018

Investment Objective

The fund aims to track the HSBC Economic Scale Index World (the "Index"). The fund will normally invest in equity securities (shares) of companies in the same proportions as their weighting in the Index. This is known as "full physical index replication". In certain circumstances the fund may not hold all of the equity securities of the Index and may hold equity securities which are outside of the Index. The fund may hold equity securities in a smaller number of companies than is in the Index, with the aim of delivering the same return as the Index. This is known as "partial physical index replication". The Index is made up of shares of companies in developed market countries. Companies are represented in the Index in proportion to their economic contribution to the global economy. The approach differs from and aims to generate a higher return for a similar level of risk than the more traditional market capitalisation indices. Where the fund's investment in certain equity securities of the Index is restricted, it may use derivatives to meet its investment objectives. The fund may also use derivatives for hedging or for cash flow management purposes. For operational purposes the HLM Fund may hold a proportionately small amount of its holdings in cash.

Performance History in EUR (Bid Price)

Cumulative Performance	Last 3 months	Last 6 months	Last 12 months	Last 3 years	Last 5 years	Since Launch	Annualised Since Launch
	0.36%	4.53%	8.13%	25.19%	50.62%	49.13%	2.11%
Calendar Year Performance	2012	2013	2014	2015	2016	2017	
	12.40%	16.71%	16.71%	6.01%	11.73%	6.20%	

The annualised rate shows the average return per year since the fund's launch. Past Performance Rate is shown net of Annual Management Fee but excludes any other charges and taxes. Past performance is not necessarily a guide to future performance, and the value of the investment can go down as well as up. Currency fluctuations may affect the value of the investment. Any sharp fluctuations in the performance of the fund over a period of time are not necessarily represented by the performance rate or by the annualised rate indicated.
