L-ghan tal-polza

Il-Wealth Management Plan huwa pjan ta' investiment ta' assigurazzjoni fuq il-hajja *unit-linked* bi primju wieħed, li għandu firxa ta' *sub funds* ('fondi'). Hu mezz ekonomiku biex wieħed jinvesti fis-swieq finanzjarji ta' barra u lokali, li l-ghan tiegħu hu biex jipprovd tkabbir tal-kapital fuq żmien medju jew fit-tul.

Il-pjan joffri l-flessibilità biex taqleb min fond għall-ieħor u b'hekk jippermettilek li tirrejaġixxi għall-iżviluppi li jkunu qed isiru fis-suq. L-ghan tal-pjan hu li jipprovd pagament ta' somma waħda meta jagħlaq.

Tista' tibda b'kontribuzzjoni minima ta' Lm2,500 / €5,823.42, u tista' tinvesti kemm trid ghax m'hemmx ammont massimu. Dan jistà jiġi investit f'massimu ta' 4 fondi b'minimu ta' 25% f'kull fond. M'hemm l-ebda tul ta' żmien minimu imma dan l-investiment huwa magħmul biex jinżamm għal għaxar snin jew iktar biex ikun hemm il-possibilità ta' tkabbir fuq il-kapital matul dan iż-żmien. Il-perijodu ta' dan l-investiment jasal sa' 45 sena.

Il-pjan jipprovd beneficiċċu ta' assigurazzjoni fuq il-hajja. F'każ li tmut il-hajja assigurata, aħna nħallu 101% tal-prezz *bid* tal-fondi. Din l-assigurazzjoni garantita fuq il-hajja tibqa' għaddejja sakemm il-hajja assigurata tagħlaq 61 sena, wara dan, jithallas biss il-valur *bid* ta' l-units.

Key features

This document outlines the main features of the Wealth Management Plan. You should read it in conjunction with the brochure and your personal quotation. Please read it carefully and keep it with your plan documents. Full details are contained in the Policy Terms and Conditions. A copy is available on request from HSBC Life.

Any dispute relating to this policy shall be subject to the exclusive jurisdiction of the Maltese courts. All policies are governed by the laws of Malta.

Its aims

The Wealth Management Plan is a single premium, unit-linked, life assurance investment plan with a range of local and international sub funds ('funds'). It is a cost-effective route to invest in global and local financial markets and aims to provide capital growth over the medium to long term.

The plan offers the flexibility to switch between funds allowing you to react to market developments. The plan aims to provide a lump sum on maturity.

The minimum initial investment is Lm2,500 / €5,823.42 and there is no maximum. This amount can be invested in a maximum of 4 funds with a minimum of 25% in each fund. There is no minimum term but the Wealth Management Plan is designed to be held for a period of ten years or more to allow the chance for capital growth. The maximum term for the investment is 45 years.

The plan provides the added benefit of limited life cover. In the event of the death of the life assured 101% of the bid price of the funds is paid. This guaranteed life assurance element remains in force until the life assured reaches the age of 61, after this, only the bid value of units is paid.

Il-polza tiegħek tista' tkopri sa tnejn min-nies. F'dan il-kaz il-polza thallas ma' l-ewwel mewt u imbagħad tieqaf. Tista' wkoll tkopri l-ħajja ta' persuna differenti mid-detenu tal-polza, fejn is-somma assigurata titħallas mal-mewt tal-ħajja assigurata. Mhx possibbli li żżid jew tneħhi ħajja assigurata minn polza li tkun digà ħarġet. Għalhekk għandek tiddeċċiedi jekk tkoprix żewġ ħajjiet qabel ma toħroġ il-polza.

Riskji tal-pjan

- ▶ Il-passat mhux garanzija tal-futur. Il-valur ta' l-investiment kif ukoll tal-munita li fiha hu iddenominat jista' jinżel kif ukoll jitla' u tista' ma tieħux lura dak li investejt fil-bidu.
- ▶ It-naqqis ta' l-ispejjeż tal-bidu jfisser li jekk tiġbed mill-investiment fi żmien qasir tista' ma tieħux il-kapital originali li tkun investejt.
- ▶ L-inflazzjoni tnaqqas il-valur tal-polza tiegħek meta din timmatura.
- ▶ Il-fondi huma denominati f'lira Maltija. Il-fondi appoġġjati magħhom huma f'muniti barranin. Tibdil fir-rati tal-kambju jista' wkoll jaffetwa il-valur ta' l-investiment tiegħek.

Meta thallas il-polza?

Il-polza thallas meta timmatura jew qabel jekk tiġi nieqsa il-ħajja assigurata. Meta l-polza timmatura, HSBC Life tagħti lill-benefiċjarju il-valur *bid* ta' l-investiment.

Fejn huma investiti flusi?

Il-Wealth Management Plan joffri total ta' 18-il fond *unitised* li huma kemm lokali u internazzjonali u ibbażati f'*bonds* u ishma. Dawn il-fondi huma appoġġjati ma' assi f'diversi muniti, primarjament f'euro, dollaru Amerikan, lira sterlina u lira Maltija.

Minn dawn it-18-il fond *unitised*, HSBC Life Assurance toffri 3 fondi strategiči li jinvestu f'tahlita tal-15-il fond l-oħra. Għażilna dawn il-fondi propju biex jaqblu ma' preferenzi ta' riskju li jista' jkollhom id-detenu.

Your plan can cover up to two people (joint lives). The policy will pay out on the first death and it will then end. The policy can also cover the life of another person who is different from the owner. The policy proceeds are paid out on the death of the life assured. It is not possible to add a person to, or remove them from, an existing plan. You must decide when taking out the plan if two people are to be covered.

Risk factors

- ▶ Past performance is not necessarily a guide to future performance. The value of investments and the currency in which they are denominated may go down as well as up and you may not get back your original investment.
- ▶ The deduction of the initial charges means that if you withdraw from the investment in the short-term you may not get back the capital originally invested.
- ▶ Inflation reduces the purchasing power of the maturity value of your policy.
- ▶ All of the funds are denominated in Maltese lira but underlying funds may be in different currencies. Changes in currency exchange rates may affect the value of your investment on conversion.

When will the policy pay out?

The policy will pay out on its maturity or earlier on the death of the life assured. Upon maturity HSBC Life will pay to the designated beneficiary the bid value of the investment.

Where is my money invested?

The Wealth Management Plan offers a total of 18 local and international unitised funds denominated in Maltese lira and based on bond and equity investments. These funds are backed by underlying assets held in a range of currencies, primarily euro, US dollar, sterling and Maltese lira.

HSBC Life tista' żžid u tibdel il-Maniġers tal-Fondi, l-iskemi ta' investiment kolletiv u l-fondi skond it-termini imsemmija fil-Kundizzjonijiet tal-Polza. Kopja ta' dan tinkiseb mingħand HSBC Life Assurance (Malta) Ltd.

Kif nagħzel il-fondi?

Dan jiddependi ninn numru ta' fatturi, bħal l-età, preferenzi ta' riskju u l-għanijiet ta' l-investiment. Per eżempju, jekk ghadek żgħir, tista' tippreferi li tinvesti persentaġġ mill-portafoll tiegħek f'ishma. Għalkemm l-ishma jistgħu jinżlu jew jitilgħu, fuq żmien twil normalment immorru ahjar minn forom oħra ta' investiment.

Jekk wasalt biex tirtira, tista' tippreferi l-fondi ta' *bonds* lokali jew internazzjonal li huma iżjed kawti u anqas esposti għal tħalli u nżul.

Jekk int tibża' mir-riskju jew ma tiddejjaqx tirriskja ħafna, selezzjoni bilanċjata ta' fondi ta' ishma u *bonds* lokali u internazzjonal li toffri livell raġjonevoli ta' sigurtà iż-żda wkoll potenzjal tajjeb ta' tkabbir fil-kapital, tista' tkun l-aktar investiment xieraq.

L-Uffiċċiali li Jippjanaw il-Finanzi jistgħu jgħinuk tagħżel il-fond jew fondi li jaqblu ma' l-għanijiet ta' l-investiment u preferenzi ta' riskju tiegħek.

B'liema prezz jiġu allokati l-units fil-polza?

Normalment ikun hemm differenza ta' mhux aktar minn 5% bejn il-valur *bid* u il-valur *offer*. How do I choose the funds?

This will depend on a number of factors, such as your age, attitude to risk and investment objectives. For example, if you are still young, you may wish to invest a percentage of your portfolio in equities. Although subject to volatility, equities, in the long term usually outperform other forms of investment.

If you are nearing retirement, you may prefer the more cautious local or international bond funds that are less subject to volatility.

If you are neither particularly risk averse, nor a risk taker, a balanced selection of international and local bond and equity funds giving a reasonable level of security but plenty of potential for capital growth, may be the most appropriate investment.

Our Financial Planning Officers can help you choose the fund or funds that match your investment objectives and your attitude to risk.

At what price are units allocated to the policy?

The funds have bid and offer prices which will be quoted in Maltese lira. HSBC Life will use the premium available for investment to purchase HSBC Life units at the offer price determined on the next valuation after the policy is issued, at the fund proportions chosen by you. The bid price is the price HSBC Life pays when the client sells the units upon maturity or surrender. There is normally a differential of not more than 5% between the bid and offer prices. The investments will be notionally allocated to the policy for the purposes of determining the benefits attributable to the policyholder. HSBC Life Assurance will remain the legal owner of the underlying investments.

Kif inhu ikkalkulat il-valur tal-fondi?

L-assi ta' kull fond huma ivvalutati f'intervalli ta' mhux aktar minn xahar u jiġu ffissati l-prezzijiet ta' l-unit u ta' l-offerta għal kull fond. F'dan il-process l-attwarju jieħu kont tal-valur fis-suq ta' l-assi li huma appoġġjati u tal-fatturi relevanti l-oħra kollha, inkluži l-ispejjeż.

X'inhuma r-regoli dwar il-facilità li wieħed jibdel it-tahlita tal-fondi?

Dan isir fuq baži ta' prezz *bid-to-bid*. Il-qlib ta' *units* bejn fond u ieħor isir bla ħlas għall-ewwel darbejnej f'kull sena kalendarja, it-tielet qlib hu suġġett għal-ħlas ta' Lm20 / €46.49 waqt li qlib ieħor ikun suġġett għall-ħlas ta' Lm10 / €23.29 kull darba.

Meta taqleb inti tista' jew tittrasferixxi l-*units* kollha għall-fond ġdid u ma thalli l-ebda bilanċ fil-fond originali jew iżżomm il-fond originali miftuh billi thalli valur ta' mhux anqas minn Lm100 / €232.94.
