Investment Objectives

The HLM Fund seeks to achieve long-term total return expressed in euro by investing in a broad range of asset classes across global markets through investment in an underlying fund or funds. The underlying fund/s will invest mainly in fixed income securities (or assets) with some or no exposure to equities. The underlying fund/s may also invest in other financial instruments, financial derivatives and engage in leverage which may result in the overall risk exposure of the underlying fund to exceed the total net assets. The prospectus of the underlying fund/s provides further detail on the investment objective, investment policy and risk factors. For operational purposes the HLM Fund may hold a proportionately small amount of its holdings in cash.
