## HLM Global Bond Fund (HLM Fund)

Fund No 5

HLM Fund Info Sheet As At: 31 January 2024

### Investment Objectives

The Fund seeks to maximise long-term total return expressed in euro by investing primarily in international fixed income securities through investment in an underlying fund or funds. Currency risk arises from fluctuations in the euro against the base currency of the underlying fund. The underlying fund may invest in financial derivatives, other financial instruments and engage in leverage which may result in the overall risk exposure of the underlying fund to exceed their total net assets. For the full investment objectives, investment policy and risk factors of the underlying fund please consult the current prospectus. For operational purposes the HLM Fund may hold a proportionately small amount of its holdings in cash. When replacing an underlying fund the HLM Fund may also retain all its holdings in cash for the short period required between receipt of settlement price and execution of the buy order.
