

Key investor information

This document provides you with key investor information about this UCITS. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

HSBC SELECT DYNAMIC

A unit: ISIN code: FR0010329359

Management Company: HSBC Global Asset Management (France)

Objectives and investment policy

Description of the objectives and investment policy:

- ▶ The objective of the “Diversified” mutual fund is to offer diversified, active management on equity and fixed-income markets over a minimum investment period of five years. Despite operating within larger allocation limits, the mutual fund’s profile may be compared with an allocation made up of 70% equities and 30% public and private bonds on average, invested in developed markets with a euro bias as well as in emerging markets for diversification purposes.
- ▶ The investment strategy is discretionary and is based on a portfolio management process organised around three pillars:
 - a medium/long-term strategic asset allocation depending on the manager’s level of conviction (asset classes, geographical areas, sectors),
 - a tactical allocation resulting from the manager’s short-term convictions which strives to take advantage of potential market opportunities,
 - a selection of undertakings for collective investment (UCI) and managers likely to generate performance over time.

Key features of the UCITS:

- ▶ Up to 100% of the mutual fund’s assets are invested in units or shares of French or European undertakings for collective investment (UCI), managed primarily by the HSBC Group, with the following allocation limits:
 - *Equity UCI*: between a minimum of 50% and up to 80% of the mutual fund’s assets, invested in all sectors, all geographical areas, and all capitalisations.
 - *Fixed-income product UCI*: up to 50% of the mutual fund’s assets, without any predefined minimum, divided between government securities and corporate securities, European or international, investment grade or high yield, or deemed equivalent by the

management company (up to 30% of the mutual fund’s assets), emerging debt (in the same proportions), and convertible bonds.

The management company does not exclusively or mechanically use ratings provided by credit rating agencies and favours its own credit risk analysis to assess the credit quality of the assets and in the selection of securities to purchase and sell.

- ▶ The mutual fund may also invest up to 20% of its assets in UCI with diversified and/or flexible profile as part of “absolute return” strategies.
- ▶ The mutual fund may also use French or European index-based UCI or trackers (French or European UCITS funds or AIFs).
- ▶ Up to 75% of the mutual fund’s assets may bear a foreign exchange risk.
- ▶ The mutual fund may borrow cash up to 10% for cash flow imbalance reasons.
- ▶ The mutual fund may invest in financial contracts, on regulated, organised, or OTC markets (swaps, futures, options or currency futures) for the purposes of equity and/or interest rate risk hedging and/or exposure and exchange rate risk hedging.
- ▶ The amounts distributable from A units are accumulated.
- ▶ Minimum recommended investment period: more than 5 years.
- ▶ Subscription and redemption requests are accepted at any time until 12:00 p.m. and executed daily on the basis of the next net asset value (i.e. at an unknown price).
- ▶ Settlements relating to subscription requests are carried out on the second business day following the date of establishment of the net asset value.
- ▶ Settlements relating to redemption requests are carried out on the third business day following the date of establishment of the net asset value.

Risk and return profile

- ▶ Historical data, such as data used to calculate the synthetic indicator, may not be a reliable indication of the future risk profile of the UCITS.
- ▶ The risk category associated with this fund is not guaranteed and may change over time.
- ▶ The lowest category does not mean that the product is “risk-free”.

- ▶ The mutual fund is classified in category 5. This classification corresponds to a variable combination of exposure to equity and bond markets.
- ▶ The following risks, not taken into account in the indicator, may also have a downward impact on the net asset value of the UCITS:
 - Credit risk: risk that the financial situation of the issuer of a bond or a debt security will deteriorate, the extreme risk being the default of the issuer.
 - Risk associated with financial contracts: the use of financial futures may lead to replicating, increasing, or reducing an exposure to markets, indices, assets, etc. The fund’s net asset value may thus, in some cases, change in a different way from that of the underlying markets to which the fund is exposed.

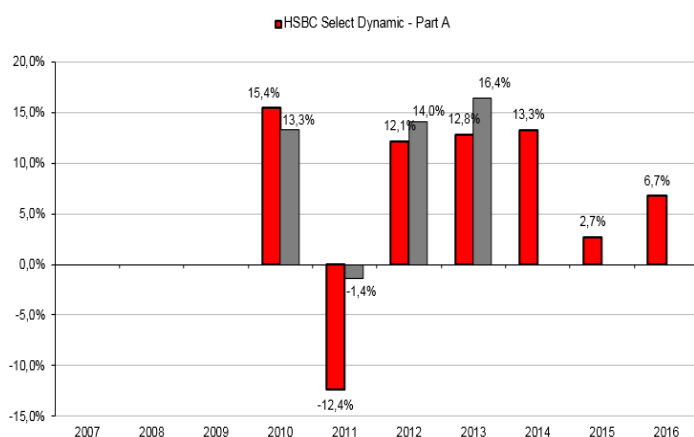

Fees

"Fees and commissions charged are used to cover the operating costs of the UCITS, including the costs of marketing and distributing units. These fees reduce the potential growth of investments."

One-off fees deducted before or after investment	
Entry fees	2%
Exit fees	None
The indicated percentage is the maximum that may be deducted from your capital before it is invested. In some cases, the investor may therefore pay less. Investors may obtain the actual amount of entry and exit fees from their adviser or distributor.	
Fees deducted by the UCITS over a year	
Ongoing charges	1.66%
Fees deducted by the UCITS under certain circumstances	
Performance commission	None

- ▶ Ongoing charges are based on fees for the previous fiscal year ended December 2016 and may vary from one year to the next.
- ▶ For more information on fees, please refer to the "fees" section of the prospectus of this UCITS available at: <http://www.assetmanagement.hsbc.com/fr>
- ▶ Ongoing charges do not include performance commissions and intermediation fees except in case of entry and/or exit fees paid by the UCITS when it buys or sells units of another collective management vehicle.

Past performance

The arrow above corresponds to the period during which a different benchmark was used. The performance shown before was achieved under circumstances that are no longer relevant.

- ▶ Past performance is not a reliable indicator of future performance.
- ▶ The calculation of past performance takes account of all fees except entry and exit fees.
- ▶ Performance figures are calculated with net coupons reinvested for the mutual fund and gross dividends reinvested for the index.
- ▶ The mutual fund was created on 7 January 2009.
- ▶ The A unit was created on 7 January 2009.
- ▶ Past performance figures have been calculated in euros.
- ▶ The benchmark was eliminated on 25 September 2014.
- ▶ For more details about the benchmark, please refer to the "Objectives and investment policy" section.
